Re: *Owen, et al. v. Elastos Foundation, et al.*, Case No. 1:19-cv-05462-GHW (S.D.N.Y.)

Ben:

We write on behalf of the Elastos Foundation (“Elastos”), Rong Chen, and Feng Han (collectively “Defendants”) in response to your email of May 24, 2022 and your letter of June 3, 2022.

Document Collection

Defendants have completed their document collection. In the interests of transparency, a detailed breakdown of everything we have collected is provided in the chart at Exhibit A. As the chart shows, Defendants have collected 867,230 documents from 17 custodians, both within and outside of China. The documents include documents in Elastos’ own possession as well as in the possession of the individual custodians. We are confident that Defendants’ collection is more than sufficient for the purposes of this action.

Search Term Hit Reports

Now that Defendants’ document collection is complete, we are able to provide final hit reports for the search terms.

- Exhibit B shows hits on all Elastos Google email and Google drive documents in the U.S.
 - Total hits: 156,928
- Exhibit C shows hits on all non-Elastos documents in the U.S.
 - Total hits: 185,585
- Exhibit D shows hits on all Elastos Tencent documents in China
 - Total hits: 15,453
- Exhibit E shows hits on all non-Elastos documents in China
 - Total hits: 24,860

As these reports show, the search terms yielded 382,826 hits, inclusive of full parent-family relationships, regardless of whether family members themselves did not hit on such search terms or were not readily amenable to text searchability. This enormous hit count is more than sufficient for the purposes of this litigation.

Document Review

We have now reviewed all documents that hit on the search terms. As we've described in our prior correspondence, we have taken a very broad approach to our responsiveness review: if a document hits on a search term and is relevant to Elastos, ELA Tokens, or any other relevant aspect of this case, we will produce it unless it is protected by the attorney-client, work product, or other applicable privilege. As a result, along with our initial production and the production that we anticipate will be made on Friday, June 10, Defendants will have produced over 230,000 documents. To the extent that we determine that any documents initially withheld on the basis of privilege are not privileged upon further review, or that there are any other documents that have been reviewed and need to be produced, Defendants will produce such documents as soon as possible. This production is more than sufficient for the purposes of this litigation.

Consent Requests

Attached as Exhibit F is a chart that details the responses we received from custodians in their executed consent forms. At this time, we do not anticipate receiving any other consent forms. Defendants do not waive any applicable privileges by producing this information and reserve all rights over the consent forms and any other communications with these custodians.

We have recently learned that two custodians we previously believed are currently in China are not: Hongjie Hu is currently located in Canada, and Leo Lei is currently located in Australia. Pursuant to his consent form, Leo Lei has refused to allow Defendants to collect certain Elastos-related data from his personal devices and social medial accounts. We have reached out to him to try to obtain this data. (As Exhibit F shows, he has consented to the collection of all of his Elastos-related data.)

Despite our significant efforts, we have not been able to obtain consent from Fay Li, Clarence Liu, or Kevin Zhang to collect any of their data. Because they are in the U.S., we have been able to collect, review, and produce their Elastos Google email and Google drive data. As a result, if Plaintiffs wish to obtain further data from these individuals, Plaintiffs should serve Rule 45 subpoenas on them. As a courtesy, we provide the following contact information for these individuals:

- Fay Li: Represented by William Hay, William Hay & Co., whay@siena.com; +852 9022 2879
- Clarence Liu: [REDACTED]
- Kevin Zhang: [REDACTED]

(Note that Clarence Liu's and Kevin Zhang's personal information should be kept confidential, and if this letter is to be filed publicly on the docket, redacted.)

In particular, we encourage Plaintiffs to use the Rule 45 subpoena process to obtain consent to the collection of any data these individuals may have in China. If Plaintiffs are able to obtain consent in accordance with the PIPL, Defendants will collect, review and produce any documents in Elastos' possession from these custodians.

Your Email and Letter

Below please find our responses to the items raised in your email and letter.

(1) Date Range. As you know, Defendants have used a November 1, 2017 cutoff date for document production because such a cutoff was in line with Plaintiffs' own allegations in the Amended Complaint. Now that the document review is complete, Defendants are open to considering a narrow expansion of the date range. We will consider your offer of January 1, 2017, and get back to you with an informed response. Counsel for Defendants is occupied with its upcoming document production and the exchange of privilege logs. Defendants will be able to provide an informed counterproposal regarding an expansion to the date range by Monday, June 20, 2022. If the parties are not able to resolve their dispute after that, then Plaintiffs can raise this with the Court.

(2) Search Terms. Please explain why you are first proposing this enormous expansion of the search term list now, at the end of the document production process. We have been meeting and conferring about document collection and production since early March. Defendants first sent a search term hit report to Plaintiffs on April 13, 2022, and followed up with an updated set of reports on May 4, 2022. We never received any comments or edits to those search term lists until your May 24, 2022 email, sent more than a week after the substantial completion deadline. Moreover, a review of your proposed search terms makes plain that there is no reason why they could not have been raised earlier (e.g., with your list of proposed custodians).

To run Plaintiffs' search terms now would impose enormous, unnecessary costs on Defendants. As Plaintiffs know, Defendants were forced to hire a team of contract attorneys to review the hundreds of thousands of documents that Plaintiffs sought. That team (which at its peak numbered 9 reviewers for China-based data and 42 reviewers for U.S.-based data) has been largely disbanded now that the document review is complete. To reconstitute a huge review team is difficult and expensive, as reviewers move on to new matters and may not be able to return to the review, forcing Defendants to hire and retrain new reviewers.

As explained above, Defendants are confident that the documents that have been and will be produced are sufficient for this litigation. Once Plaintiffs have had the opportunity to review Defendants' latest production, Defendants will consider reasonable, narrowly targeted searches for documents or categories of relevant, responsive documents that Plaintiffs can show need to be produced.

(3) New Custodians. Two of the individuals on Plaintiffs' list of newly proposed custodians (Heng (Ben) Li and Shunan (Nan) Yu) are already custodians. Plaintiffs provide no explanation for why Defendants should be forced to add any of these other proposed custodians at this stage of discovery. Plaintiffs proposed their list of custodians on March 15, 2022, and Defendants agreed to all possible custodians in our April 13, 2022 letter. Once Plaintiffs have had a chance to review Defendants' production, Defendants will consider adding new custodians if Plaintiffs demonstrate that there is an actual need for those custodians' documents.

(4) Redactions. The redactions you describe were added by our PRC law firm to comply with the privacy requirements of the PIPL. As extensively discussed before, Defendants are not allowed to collect, process and provide data overseas containing personal information without first obtaining express written consent from the affected individuals under the PIPL. As such, except for the personal information of

PAUL
HASTINGS

Bleichmar Fonti & Auld LLP

Raiti, PLLC

June 8, 2022

Page 4

custodians from whom we have received, our PRC law firm has reviewed all relevant documents to be transferred, identify the personal information contained therein, and make redactions to avoid inadvertent transmission of personal information to outside of China. Please note that such redactions made by our PRC law firm only focus on documents originally located and collected in China. We are looking into adding metadata reflecting that such redactions exist as well as the basis for them, but note that the redactions themselves are self-evident, as to both their existence and the basis for them, given that the redactions state "PII," rendering this requirement largely unnecessary.

(5) Purportedly Missing Files. We collected and produced the documents in this case in the format in which they originally existed, inclusive of their existing parent-child relationships, consistent with Section IV.M. of the ESI Protocol, unless otherwise indicated and as will be indicated in Defendants' privilege log. To the extent documents appear to contain attachments but do not, those documents were not recoverable or reviewable in a parent-child format. As to the specific examples you referenced:

- ELF-00108542 was produced with its two extent attachments, ELF-00108546 and ELF-00108547. To the extent the document reflects other attachments, voice messages, emojis, or embedded files these documents did not exist in the parent-child relationships that existed when these documents were collected and reviewed.
- ELF-00091826 is a link to a request to permit access to a particular Google spreadsheet. This document is one of a number of documents that is automatically generated in connection with the use of the Google Sheets program. These documents typically do not contain any attached material themselves. As such, and as we can confirm as to this specific document, these kinds of documents typically do contain attachments in the existing parent-family relationships in which the parties are required to make productions consistent with Section IV.M. of the ESI Protocol.

(6) Related entities. The Elastos foundation and all related entities share the same email and document systems. As a result, there are no documents associated with any of the entities listed in your email.

(7) Further productions. As explained above, after the production anticipated to be made on June 10, 2022, Defendants plan to make one more small production of documents that are determined to be non-privileged or that otherwise have not been produced. Defendants do not anticipate making any further significant productions after that.

(8) Plaintiffs' Production. We note that plaintiff's own document production is incomplete. While we will discuss plaintiffs' document production in greater detail in subsequent correspondence, we note that Plaintiffs' production so far appears to consist mainly of (1) automated messages from Medium re posts, some of which relate to \$ELA; (2) automated messages from twitter re posts, a minority of which relate to \$ELA; and (3) a handful of Elastos weekly updates.

Plaintiffs' Motion to Compel

We believe that the information we've provided in our correspondence and our fulsome document production easily demonstrates that there is no reason for the court to force Elastos to violate the PIPL. In light of the significant volume of documents that we are producing, and if Plaintiffs insist on filing their proposed motion to compel, Defendants will consider a reasonable extension to the briefing schedule, to

ensure that Plaintiffs have the opportunity to review the full production and address any issues Plaintiffs believe need to be addressed.

Sincerely,

/s/ Zachary Zwillinger
